AHSAN SARWAR- DevOps Engineer (Intern)

Liaquatpur, Punjab, Pakistan
Phone: +92 329-3879732 | Email: Ahsanjutt1627@gmail.com
LinkedIn: www.linkedin.com/in/ahsan-sarwar-3232b4290

Professional Summary

Motivated Computer Science graduate with hands-on experience in **Linux administration**, **Docker containerization**, **cloud infrastructure**, and **networking fundamentals**. Skilled in deploying containerized applications using Docker and managing Linux-based cloud servers on AWS EC2. Actively learning **CI/CD pipeline automation**, **Kubernetes orchestration**, and **infrastructure as code (IaC)** to strengthen DevOps engineering expertise. Seeking a DevOps internship to apply practical knowledge in cloud, automation, and infrastructure management.

Technical Skills

- **Docker**: Container lifecycle management, Dockerfile creation, image building, container networking, CLI commands, layer caching.
- **Cloud**: AWS EC2, SSH access management.
- **Git & GitHub**: Repository management, branching/merging, conflict resolution, GitHub workflows, SSH authentication, collaborative development.
- **Linux**: Shell navigation, user/group management, file permissions, package management (APT), process monitoring, SSH configuration.
- **Networking**: OSI/TCP-IP models, IPv4 addressing, subnetting, NAT, DNS, DHCP, ARP, TCP handshake, routing fundamentals.

Technical Experience

Self-Directed DevOps and Infrastructure Lab

- Built and deployed a containerized Flask web application using Docker.
- Created custom Dockerfiles for consistent and portable environments.
- Configured Docker port mapping (8080:5000) for external access.
- Managed Linux-based AWS EC2 instances with secure SSH authentication.
- Practiced Git/GitHub workflows including repository management and version control.
- Learning CI/CD pipeline automation with GitHub Actions.

Projects

Blockchain-Based Academic Credential Verification (Final Year Project)
The Islamia University of Bahawalpur

- Developed a blockchain-based web application for secure credential verification.
- Implemented tamper-proof data security and designed the overall system architecture.
- Built decentralized system architecture using blockchain concepts.

Tech Stack: Solidity, Remix IDE, MetaMask, HTML, CSS, JavaScript.

Education

Bachelor of Computer Science (March 2022–Jan 2026)
The Islamia University of Bahawalpur, Pakistan
Relevant Coursework:
Data Communications and Networking, Operating Systems (Linux), Cloud Computing Fundamentals, Software Engineering.

Skills in Progress

- Currently Learning: CI/CD with GitHub Actions
- Currently Learning: Kubernetes (K8s)
- Currently Learning: DevOps Automation Concepts
- Infrastructure as Code (IaC).
